# Tempesta Concrete | CEMENTILES

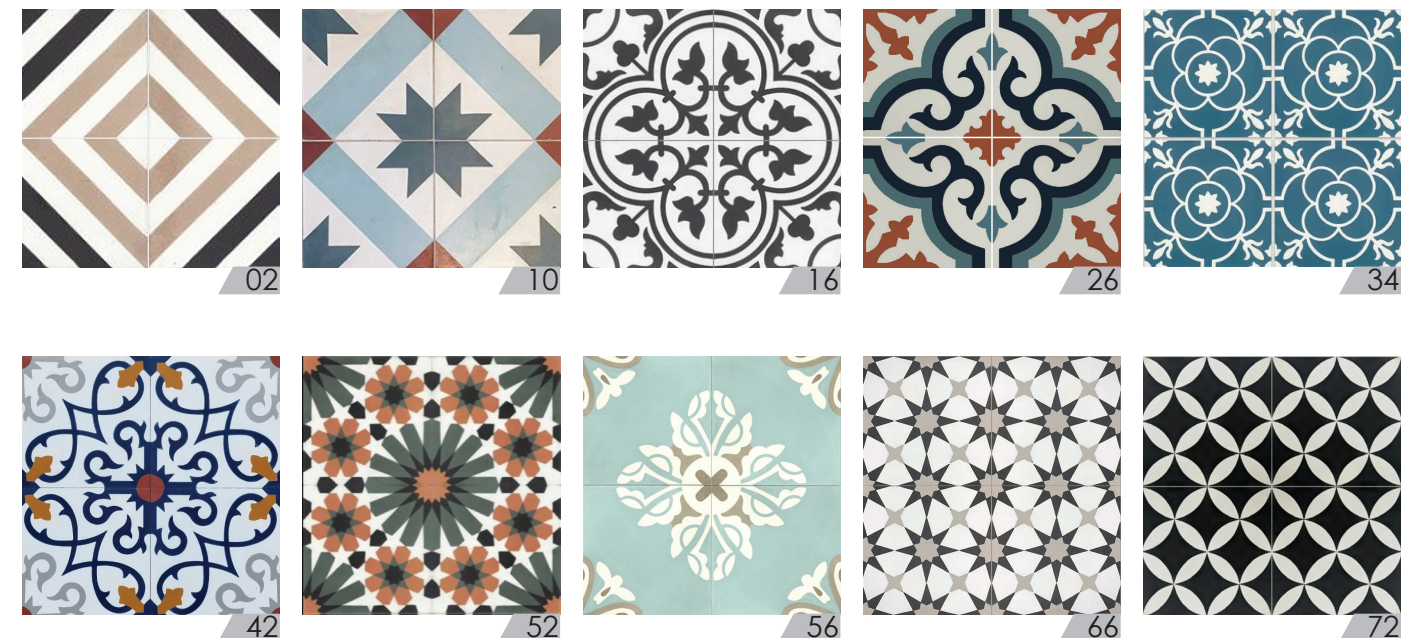

Tempesta is known for developing unique and stunning tile collections, and in continuation of the same, we offer you CEMENTILES – our latest foray into the world of decorative concrete surfaces, handcrafted in contemporary designs, and available in a range of captivating colours.

CEMENTILES are crafted from natural materials (i.e. sand, clay, and colour pigments) making them highly durable and eco-friendly. And considering they work wonders just about anywhere inside your home or commercial space - floors, walls, stairs, fireplaces, etc. - it's no surprise that they have become a raging trend in the market.

Also known as encaustic cement tiles, they are unique in that they marry traditional methods of production with modern designs and patterns, to craft an earthy yet beautiful product. Opting for the personal touch of handcrafting over the perfection of machines, cement tiles possess a certain inimitable character not achieved by other tiles.

CEMENTILES are extremely strong, completely fireproof, and can be made water-resistant by using the appropriate sealer. Due to their sturdiness and aesthetically pleasing qualities, cement tiles are very versatile - in addition to their utilisation as flooring options, they are a popular choice for cladding wall surfaces as well. They are sure to add vibrancy and character to your bathroom, kitchen, patio, courtyard, living room or dining hall whether as a highlighter, feature wall or spread across the floor.

These handmade tiles come in a myriad of rich colourways that catch the eye – something to suit every taste. From a choice of alluring geometric patterns to exquisite floral designs, a sophisticated cement tile motif can bring a distinct sense of decoration and style to just about any surface inside your home and will last a lifetime.
